Thailand to create new chapter of Smart Hospital services

31 May 2022 | News

Chunghwa Telecom Co., Ltd collaborates with Thonburi Hospital

Chunghwa Telecom (CHT) and Thonburi Hospital (TH) have signed the “Smart Hospital” Memorandum of Understanding (MoU). In light of the government of Thailand’s “Medical Hub of Asia” strategy in 2004, and its goal to become the leading Southeast Asian countries in providing international healthcare services, the two parties, CHT and TH, continue their smart ward POC collaboration, and achieve a new milestone of smart hospital application in Thailand.

Allied with outstanding partners in the healthcare industry, including imedtac from Taiwan and MD Healthcare from Thailand, Chunghwa Telecom introduces to Thonburi Hospital the smart ward solutions, including smart nursing station, all-in-one vital sign kiosk, automated dispensing cabinet, Epaper Bedside Information Display and ToF Fall Management System.

These solutions help reduce the workload of medical staff, improve the quality of medical services, and raise operational performance. Chunghwa Telecom continues to increase competitiveness using ICT technologies and applications.

The smart hospital solutions provided by Chunghwa Telecom include features of cloudization, digitalization, informatization and intelligentization, which truly satisfy the market needs and the innovative services development in the long run. Through collaboration with hospitals, Chunghwa Telecom is expecting to turn the new page of its smart hospital application services on the market.
