

25th CHCC Draws 51,272 Visitors and 746 Exhibitors from Hospital Design, Build and Management Sector

22 August 2024 | News

Record Attendance and Exhibitor Participation Highlight the Success of the 25th CHCC Conference and Exhibition

The 25th China Hospital Construction Conference & International Hospital Build and Infrastructure Exposition (CHCC2024) attracted 51,272 professional visitors from 16 countries and regions. Famous enterprises at home and abroad seized the opportunity to present their new products, technologies, equipment, and solutions. The exposition covered the entire process of hospital construction, including prior planning and design, hospital construction, and follow-up logistics management. This event provided a one-stop platform for procurement, communication, and learning for cross-industry professionals in the hospital construction industry such as hospital construction decision-makers, health authorities, business executives, research institutions, designers, and agents. It significantly promoted more efficient industry development, achieved cross-industry information exchange, and advanced trade transactions in the domestic and international hospital construction market.

This year's exhibition attracted nearly 800 world-renowned companies to exhibit their flagship products and innovative products. There were 19 exhibition areas to explore emerging trends in different industries, including:

- VVIP Exhibition Area
- Hospital Planning Design and General Engineering Contracting
- Hospital Building Wall Decor Materials
- Medical Engineering Equipment
- Smart Hospital System
- Medical Clean Room, Special Ward Engineering

The CHCC2024 brought together 746 high-quality suppliers, including well-known companies such as Huakang Medical, Zhengyuhengxin, Baixiang, Shinva Medical, Esseniot, Uno, Yarward, Sanwe, Zhucheng Group, Bionlink, Midea, Lantone, Quama, Homerun, New Cloud Medical, Comen, Gree, Huazhan, Best New Medical, Dongpeng, Panasia, etc. Among them, the chief strategic partner Huakang Medical showcased its flagship products and technologies, becoming the focus of the event. It presented a 1:1 restoration of high-quality processes, cutting-edge technology applications, and scenario-based smart solutions for beautiful hospital construction, such as hand hygiene compliance management systems, smart medical purification system 3-D models, and medical space digital interactive display systems, captivating the audience with the charm of medical technology. For the first time, Zhengyuhengxin launched the "Medical Special Project Supply Chain Integrated Platform for Centralized Procurement and Promotion" and the "Medical Special Construction 6+ Consortium Win-Win Platform", aiming to achieve resource sharing and win-win cooperation in various aspects of medical clean projects.

The event also featured famous international brands such as Drager, Homerun, Gerflor, Forbo, Mondo, Armstrong, SpecChem, Telelift, Kohler, and A.O.Smith. A buyer delegation of 16 people from Thailand visited the CHCC2024. This was not their first time attending the event, and they stated that they would continue to visit next year.

During the event, 123 special forums were held, inviting 1,020 renowned experts and scholars to share their wisdom, and attracting 9,030 delegates to exchange ideas and learn. The event spanned multiple dimensions such as strategic development, industrial upgrading, discipline development, planning and design, equipment and configuration, project management, technological innovation, and intelligent operation and maintenance, fully presenting a comprehensive knowledge system for the construction of beautiful hospitals in the new era. During the conference, international meetings including the "Belt and Road" Hospital Construction Development Summit, the UK China Future Hospital Construction Symposium, the Australian Modern Hospital Planning and Construction Forum, and the 13th Sino-Foreign Hospital Architect Summit Forum were held, demonstrating a global perspective and forward-looking philosophy. The event not only facilitated the exchange of domestic and foreign research results but also provided a clear direction for the future development of the hospital construction industry, bringing profound academic significance and impact.

The CHCC2024 Hospital Construction Awards were also announced during the event, honoring 243 individuals across three main categories: 66 people received the "Project Award", 87 the "Individual Award", and 80 the "Enterprise Award". Additionally, hospital visits were held, including four tours to exemplary hospitals: The History Hall of West China Hospital, Sichuan University, Sichuan Cancer Hospital (Tianfu Branch), Chengdu BOE Hospital, and Care Alliance Hetai Rehabilitation Hospital of Chengdu Tianfu New Area. These visits helped peers in the

hospital construction industry gain theoretical knowledge while also providing a direct experience of innovative achievements in modern hospital construction.

The Booming Hospital Construction Market in China

China has the largest hospital construction market in the world. According to the National Health Commission of the People's Republic of China, by the end of 2022, there were 1,032,918 medical and healthcare institutions in total, including 36,976 hospitals, providing 9.75 million beds, with the number of beds per 1,000 people reaching 6.92. There is still significant market growth potential to reach the 2025 target for beds per 1,000 people in medical and healthcare institutions. In March 2024, the State Council officially launched a document on new round of large-scale equipment upgrades. The document explicitly proposes a growth of over 25% in medical equipment investment by 2027 compared to 2023, along with plans for ward renovations and improvements and other key contents.

Please stay tuned for the upcoming CHCC2025, which is expected to feature 900 exhibitors and attract 60,000 professional visitors. The CHCC2024 will be held from May 17 to 19 at the Wuhan International Expo Center, China.
