

iSirona signs reseller deal with myHealth Sentinel

30 August 2013 | News | By BioSpectrum Bureau

Singapore: Panama-based iSirona, a provider of simplified solutions for medical device integration, has formed a strategic reseller agreement with Singapore-based myHealth Sentinel (mHS). mHS, which specializes in telehealth and technology solutions for healthcare, is Singapore's first home grown, commercial service provider of cloud-based telehealth services in South East Asia. Under the agreement, mHS will resell, implement, and support iSirona's medical device integration solutions in Singapore.

"We're looking forward to working with a respected Singaporean company to effectively support our groundbreaking software solutions in the Asia-Pacific region," said iSirona founder and CEO Mr Dave Dyell. "Our goal is to work with Singapore's regional healthcare service providers to showcase iSirona's industry leading solution," he added.

"myHealth Sentinel is honored by and excited about the partnership with iSirona, who we consider to be the number one device integration vendor in the industry," added Mr William Chew, CEO and co-founder of myHealth Sentinel. "As leaders in our respective fields, the combination of our telehealth expertise and iSirona's advanced device connectivity solution provides a modular and cost-effective approach for integrating patient device data from across an extended enterprise to the EMR," he said.
